No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                Score

cystatin - chum salmon

N.Alternate names: cysteine proteinase inhibitor

C;Species: Oncorhynchus keta (chum salmon)

C;Date: 14-Jul-1994 #sequence_revision 14-Jul-1994 #text_change

C;Accession: JC2040

C;Accession: JC2040

R;Koide, Y.; Noso, T

Biosci. Biotechnol. Biochem. 58, 164-169, 1994

A;Title: The complete amino acid sequence of pituitary cystatin

A;Reference number: JC2040; MUID:94162738; PMID:7764512
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                A;Cross-references: GDB:136380; OMIM:123858

TISSUE SPECIFICITY: Proximal caput region of the epididymis. expression in the testis. Within the testis it is localized to expression for the epididymis as the elongating spermatids, whereas within the epididymis it is exclusively synthesized by the proximal caput epithelium.
SIMILARITY: Belongs to the cystatin family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                maturation.
